Requirements for information concerning USSR economic aid to Burmese agriculture

Background

25X1A2g

[REDACTED] reference is made to a "dam and irrigation working plan" which has been established between the USSR and Burma. There is very little information available on the plan.

1. What does this plan involve? Exactly, what are the projects within the plan? What is the known or estimated cost of the plan? How much foreign exchange will be needed? How many Soviet personnel will be needed? By what date are the projects to be completed?

2. Has an actual agreement been signed for these projects? If so, when was it signed and what are the details? If not, under what type of arrangement is the work being carried on?
